## **LAKE LOWERING**

To All Lakeside Residents

November 21, 2008

This is to advise all residents that we will be lowering the lake beginning the first week in January for a period of about three (3) weeks:

**BEGIN LOWERING: January 3, 2009**

**RE-FILL BEGINS: January 24, 2009**

We expect the lake to return to normal levels within 2-3 weeks after the above re-fill date. This should be by about mid February.

Lowering is done every 2-3 years to allow for repairs to docks, piers and retaining walls. It is a good time to check for any erosion or sink holes around your walls. If you are in need of a contractor to construct a retaining walls or make repairs, please let us know and we can provide a name.

Please be sure to secure your boats. We only intend to drop the lake two (2) feet.

Hopefully, we will have a good hard freeze during the time the lake is lowered which helps greatly with insect and weed control.

If you have any questions or additional concerns please call us. A list of current Board members is printed on the back of this notice. Thank you.
